HUMAN DEVELOPMENT: A RECURSIVE BELIEF UPDATING PROCESS

An illustrative model of events, interpretations, consequences and continued revision.

1 2 3 4

$A_1 \rightarrow B_1 \rightarrow C_1$

$A_2 \rightarrow B_2 \rightarrow C_2$

D E

Activating event
An interpersonal event.

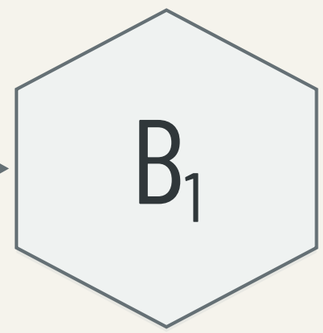

Belief / Interpretation
An interpretation of the event.

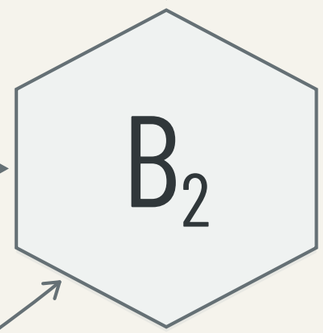

Updated belief
Reshaped by experience.

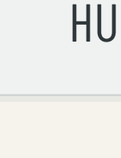

Examination
Question the belief.

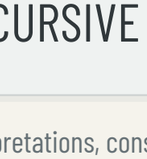

Revised philosophy
A revised way of interpreting events.

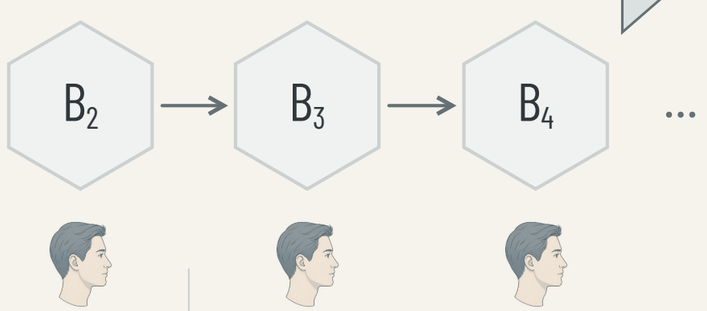

Consequence
Relationship strained.

Consequence
Relationship repaired.

Continuous belief revision

Next activating event
The consequence feeds the next belief.

Schematic: outcomes are illustrative, not measured. Individual illustrations are AI-generated.

After the ABC model of cognitive-behavioural therapy (A activating event, B belief, C consequence), with D and E shown as examination and revised outlook.
